Perfect for transferring data to bare drives

1 year warranty

## 2.5" SATA Notebook Drive Upgrade Kit

Apricorn's SATA Wire 3.0 is the easiest way to upgrade your notebook drive. Packaged with our user-friendly Cloning Software and using an ultra-fast USB 3.0 connection for up to 10x faster data transfer rates than USB 2.0, you can clone your notebook drive in a snap.

If your notebook is running out of space or you are looking to upgrade to a faster high performance hard drive or solid state drive, Apricorn's SATA Wire is the perfect tool.

Providing a USB 3.0 connection to ANY 2.5" notebook hard drive or solid state drive and bundled with Apricorn's Upgrade Suite Software, the SATA Wire enables you to upgrade your notebook's drive in three simple steps.

1. Connect the SATA Wire to your drive and to the USB port on your computer
2. Run the included EZ Gig IV or ShirtPocket cloning software to copy all of your data, email, settings and OS from your notebook to the new drive
3. Swap out your old notebook drive with your new one, and you're done.

### EZ Gig IV Cloning Software with Data Select

EZ Gig IV Cloning software is a powerful, yet easy to use tool that gives you the option of creating an exact clone of your hard drive - perfect for hard drive upgrades or for creating bootable backups of your system. Or for those who wish to clone to a smaller capacity drive, such as fast solid state drive, EZ Gig's Data Select option enables you exclude selected media files from the copying process to save space. Now you can run your OS and applications from a fast, smaller SSD boot drive, while keeping your documents and media files on your original hard drive.

The SATA Wire is also perfect for transferring data to bare drives or for creating backups of your system. Now there's no excuse when it comes to backing up or upgrading your system, just use Apricorn's SATA Wire.

# EZ Gig Cloning Software makes upgrading your notebook hard drive is easy as 1-2-3

## 1. Select your Source Drive

This is your computer's internal drive

## 2. Select your Destination Drive

This is the drive connected to SATA Wire

## 3. Click "Start Clone"

and EZ Gig IV will take care of the rest

## Optional - Data Select feature

Select files you wish to exclude from the clone, such as photos, videos, music or documents. This is helpful when migrating from a large HDD to a smaller SSD or when creating a Boot Disk.
